EXPERIENCE

Wipro Limited

Sep 2024 – Present

Full Stack Software Engineer

India

- Driving end-to-end development on the **NZDPU client project** — one of Wipro's high-visibility engagements, building robust APIs, performant UIs, and cloud-native microservices that directly serve client KPIs.
- Architected **scalable FastAPI microservices** deployed on GCP with Docker containerisation; reduced response latency by optimising Redis caching strategies across distributed service layers.
- Built full-stack features using **Next.js + TypeScript** on the frontend with PostgreSQL & MongoDB on the data layer, ensuring ACID compliance and fast reads at scale.
- Awarded Victory League Award** for delivering beyond client expectations consistently and on schedule; also recognised with Habit Flagbearer, Building Trust, Always Communicating, and Demonstrating Stewardship awards.

Amazon

May 2024 – Jul 2024

ML Data Associate

India (Contract)

- Contributed to Amazon's AI pipeline by producing and validating **high-quality machine learning datasets** for large-scale supervised learning models.
- Refined expertise in **data annotation, labelling, and quality control**; developed systematic workflows that reduced annotation errors and directly boosted dataset quality metrics.

Nanmudalavan Project — Multiple Organisations

Aug 2023 – Jan 2024

Technical Trainer

Tamil Nadu, India

- Designed and delivered curriculum covering **Networking, IoT, Programming, Simulation, and Microcontrollers** to engineering students across multiple Tamil Nadu colleges.
- Mentored **200+ students**, improving their readiness for industry roles through hands-on, project-based learning.

APSSDC

Apr 2021 – May 2021

FPGA Intern

India

- Evaluated and implemented hardware tests and **DSP systems using FPGA programming**; gained foundational understanding of signal processing pipelines at the silicon layer.
- Gained proficiency in **digital signal processing** fundamentals and hardware verification methodologies.

PROJECTS & OPEN SOURCE

AeroSense | *Next.js, FastAPI, Apache Airflow, dbt, Neon PostgreSQL, Chart.js*

- Built a **real-time flight and weather disruption analytics platform** using an ELT pipeline — ingesting live data from OpenSky Network and Open-Meteo APIs via Apache Airflow, transforming with dbt, and storing in Neon Serverless PostgreSQL.
- Engineered a **FastAPI backend** and a Next.js/TailwindCSS/Chart.js dashboard deployed on Vercel and Render; surfaces actionable disruption insights to end users in real time.

pyinr | *Python, PyPI* | pypi.org/project/pyinr

- Authored and published a **Python utility library** for Indian Rupee (INR) — handling currency formatting, conversion, and number-to-words rendering in the Indian numbering system (lakhs, crores, paise).
- Designed to eliminate boilerplate in **fintech apps, billing systems, and data pipelines** dealing with INR values; installable via `pip install pyinr`.

pymongolite | *Python, PyPI* | pypi.org/project/pymongolite

- Built and published a **serverless MongoDB engine for Python** — runs entirely locally using file-based storage (the SQLite equivalent for MongoDB), exposing a familiar PyMongo-compatible API.
- Supports **indexing, CRUD, and queries** out of the box; enables prototyping and testing of small NoSQL workloads with zero infrastructure overhead.

EDUCATION

ARM College of Engineering and Technology

Bachelor of Engineering — Electronics and Communications Engineering

- **Relevant Areas:** Signal Processing, Embedded Systems, Digital Systems Design, Microcontrollers

AWARDS & CERTIFICATIONS

Victory League Award — Wipro: On-time delivery beyond client expectations

Wipro Excellence Awards — Habit Flagbearer | Building Trust | Always Communicating | Demonstrating Stewardship

OpenEDG Python Institute — Professional Certificate

NASBA — Statistics Foundation Certification | Python Data Analysis Certification

PMI — Introduction to Data Science Certification

Anaconda — Python for Data Science Certification

SKILLS

Languages : Python, TypeScript, JavaScript, SQL

Frontend : Next.js, React, Tailwind CSS, REST APIs, GraphQL

Backend & Databases : FastAPI, PostgreSQL, MongoDB, Redis, Drupal

Cloud & DevOps : GCP, Docker, Apache Airflow, dbt

AI & Data : OpenCV, Data Annotation, Statistical Analysis, ML Dataset Engineering

Open Source : 2 published PyPI packages — pyinr, pymongolite
